Explore a land 400 million years in the making. The Arabia Mountain National Heritage Area (AMNHA) is an open landscape of breathtaking beauty, peace, and wonder just east of Atlanta along I-20. Dominated by two massive granite outcrops, it offers visitors natural wonders, compelling history and heart-pumping activity.

The PATH Foundation trail within the AMNHA is designed to link cultural, scenic, natural and historic sites. Over 20 miles of trails are open to bikers, hikers and walkers with a connection to the Monastery of the Holy Spirit opening in 2014. This interactive PDF can either be printed or viewed on a digital device. Links (shown in bold), when clicked, will lead to additional information.

There are several opportunities with the Davidson-Arabia Mountain Nature Preserve and Panola Mountain State Park to hike trails on foot (map at arabiaalliance.org) and bike racks are located at the entrances to several of these trails. Remember to always be prepared for your ride, take plenty of water and sunscreen. The terrain is hilly and some bikers should be aware that some climbs are particularly strenuous.
HISTORIC DISTRICT OF LITHONIA  Lithonia means “place of stone.” From the profusion of granite in homes and along Main Street, you can see why. The city was no more than a crossroads before the Georgia Railroad arrived linking Augusta and Atlanta in 1845. It was incorporated in 1856 and the town boundary extended just a mile from the railroad station. That boundary and many historic town buildings are intact today. Find out more about the history of Lithonia and its structures by taking this walking tour.

RAILROAD CUT  Most of the PATH trail between Lithonia and Arabia Mountain lies in an old railroad bed. The most visible evidence are the embankments north of the intersection of Woodrow and Klondike Roads. This 4-mile spur opened in 1889 and was used to transport granite from the quarries at Arabia Mountain. The increased use of trucks to haul stone, development of alternatives to building stone, and the effects of the Great Depression caused several quarries to cease operations.

QUARRY RUINS  With imposing stone walls and barred windows, many speculate this building was a jail but it was most likely an office to support a granite quarry. It’s one of several such ruins around the Nature Preserve. Park your bike and explore along the Mile Rock Trail.

FARMING TERRACES  Pause near the wildlife overlook on a long bend in the PATH and peer into the woods uphill. Can you imagine it as farmland? You may be able to see the terraces from a time when this hilly region was covered in farms. Farmers were encouraged to terrace their fields to decrease soil runoff. Much larger and older oak trees grow in the sloped faces of some terraces where rocks were also placed to stabilize the slopes and reduce erosion. The nearby Forest Trail has a short section that is located on a terrace.

HORACE KING COMMEMORATIVE COVERED BRIDGE  The covered bridge over Stephenson Creek was built by the PATH Foundation in 2004 but its design was based on the lattice truss construction used by Horace King. A slave who bought his freedom in 1846, King was an engineer and architect who built bridges across the South. At one point, King was responsible for every major crossing on the Chattahoochee River. After the Civil War, King continued building and served in the Alabama State House.

EVANS MILL RUINS  Just off the trail head parking lot are the remnants of a dam and millrace for a mill located just across Pole Bridge Creek. Notice the nearby hiking trail and cascades, this location on the creek took advantage of a drop in elevation. Dammed water was directed along the stone millrace to a wheel on the mill that would turn gears to grind grain, no motors were used. The mill ground wheat and corn which were likely used to make alcohol. This was once a lively industry of the Evans family, who lived just across the road, but it was abandoned in the 1940s.

HISTORIC DISTRICT OF KLONDIKE  The crossroads community of Klondike, listed in the National Register of Historic Places in 2007, is accessed by following the PATH east from the King Bridge to Murphy Candler School at the intersection of Klondike and South Goddard Roads. The district includes several homesteads built prior to the Civil War and several granite commercial buildings. A cotton gin used to stand behind the stone store.

POLE BRIDGE CREEK WASTEWATER TREATMENT PLANT  Built in 1973, the plant was upgraded to provide for a major biosolids (sludge) reuse program. The sludge is placed on an adjacent 550 acre hay field, which you can see from the bike path. The hay from this field is primarily used for animal feed including the elephants at Zoo Atlanta. This land application program has saved the county a significant amount of landfill space and many thousands of dollars.

FLAT ROCK COMMUNITY  Flat Rock is one of the oldest African-American settlements in Georgia. It began as an agricultural community bounded by three small slave-holding farms: the South, Lyon, and Johnson farms. After the Civil War, newly freed slaves stayed in the area forming schools, churches, and civic organizations. By the 1920s many residents had begun migrating to northern cities for better economic opportunity. This prompted T.A. Bryant, a local farmer and businessman, to purchase property which he then sold or leased under generous terms in order to encourage people to stay in Flat Rock. Today the Bryant house at 3979 Crossvale Rd is home to the Flat Rock Archives which tells the community’s story and is open to the public. President Johnny Waits offers tours which can include the slave cemetery and the Lyon Farm.

LYON FARM  This family farm is one of the oldest homesteads in the area. The Lyons were one of the first white settlers along the South River and descendants lived here until 2007. It is now owned by DeKalb County. The main portion of the farmhouse dates to the 1850s and family history notes that slaves once lived in the basement. Outbuildings such as the barn, workshop and sourghum mill reflect the self-sustaining nature of the farm. The family raised cows, hogs, cotton, muscadines, bees and a fruit orchard.

SOUTHERNESS GOLF COURSE  The Southerness Golf Course surrounding the Parker Bridge opened in 1991 but has been reclaimed as part of Panola Mountain State Park—can you see the old cart paths? Now, the links are home to an archery program, primitive camping, and a birding area.

ALEXANDER BARN  This livestock barn serves as a physical reminder that the land along the PATH was a farming landscape even as recently as the late 20th century. Landscape architect Ed Alexander owned much of the land between the South River and Alexander Lake. He sold portions to create a golf course and expand Panola Mountain State Park.

PARKER HOUSE  The Parker House is the oldest known house in Rockdale County. Aaron Parker, Jr. a veteran of the War of 1812, purchased three land lots a year after the 1821 Creek cession and moved his family from the Athens area. He built this house as the centerpiece of his plantation. After his death in 1881, the property was divided among 13 children and had various owners through the 20th century.

This type of house, Plantation Plain, was common in rural Georgia. The plan features a two story core with a rear shed addition. The room to one side of the front porch is typically called a parson’s or traveler’s room. Access through a door onto the front porch maintained family privacy.

The Southern Golf Course surrounding the Parker House opened in 1991 but has been reclaimed as part of Panola Mountain State Park—can you see the old cart paths? Now, the links are home to an archery program, primitive camping, and a birding area.

PANOLA MOUNTAIN  Panola Mountain is considered one of the finest rock outcrops in the U.S. and is a designated National Natural Landmark. The Georgia Conservancy led the conservation effort and purchased the mountain in 1974. Today the monadnock and its expanded 1,635 acre preserve are a state park. The PATH Trail winds around the park but due to the delicate nature of the ecological system, hikers are only allowed on Panola with a guide.

SERPENTINE BRIDGE  After nearly a mile-long climb from Alexander Lake, you descend into a thickly forested valley, accent by a serpentine bridge high above a creek. This area, previously slated for development, was recently incorporated into the park as a corridor for the trail.

DECASTRO RETREAT  The DeCastro Homestead was donated to Rockdale County in 1996 to be used as part of the trail system. There is a suspension bridge located ¼ mile below the DeCastro house on the right side of the trail.
